WORK EXPERIENCE

08/2023 – PRESENT

Back End Developer Capital HUB

- Led a team of 4 members as a Team Lead, overseeing efficient task completion and providing support.
- Contributed to the development of 90% of the Backend Restful APIs for the Yesgobus project, seamlessly incorporating external APIs such as Bitla Software, Ticket Simply, Seatseller API, and Phonepe payment gateway.
- Developed 75% of the APIs for the CapitalHub project, an innovative social media platform facilitating connections between startups and investors.
- Successfully deployed 3 projects on AWS with SSL certificates, guaranteeing secure and reliable web hosting.
- Transformed the Yesgobus and CapitalHub React projects into native Android projects using CapacitorJs, significantly reducing project creation time by 90%.
- Built and integrated the entire Socket.IO backend for CapitalHub, resulting in the creation of a fully functional chat system.
- Effectively incorporated various external APIs (KYC API, News API, SendGrid Mail APIs, Google Maps API) across multiple projects, showcasing versatility and a deep understanding of diverse API ecosystems.
- Demonstrated strong project ownership, ensuring successful implementation and timely delivery in a dynamic startup environment.
- Collaborated closely with UI/UX designers and frontend developers to vouch for seamless integration and delivery of high-quality products.

EDUCATION

12/2021 – 07/2023

Computer applications | Master of Computer Applications - MCA N M A M Institute of Technology, NITTE

04/2018 – 09/2021

Computer applications | Bachelor of Computer applications SDM College Ujire

CERTIFICATES

Back End Development and APIs freeCodeCamp
